EDUCATION

University of Michigan

Ann Arbor, MI

Bachelor of Science Engineering in Computer Science

May 2028

- **GPA:** 3.8, Kappa Theta Pi Technology Fraternity (Director of Philanthropy, Web Committee Lead)

EXPERIENCE

McKinsey & Company

Jun. 2026

Incoming Sophomore Summer Business Analyst

Chicago, IL

Renovait

September. 2025

Founding Software Engineer

Ann Arbor, MI

- Engineered Renovait's full-stack web platform, implementing responsive React front-end interfaces, scalable backend APIs, and AI-powered features that personalized user experiences for 500+ users
- Streamlined AI image generation pipeline by implementing asynchronous task handling and model optimization techniques, reducing average generation latency by over 40% and enhancing responsiveness under high load

Applied Materials

Jun. 2025

Data Analyst Intern

Santa Clara, CA

- Uncovered key trends for 6 business units by developing Tableau and Excel dashboards using multiple streams of HR Data to deliver actionable insights to 10+ senior stakeholders, thus informing strategic talent decisions
- Optimized internal chatbot and validated data accuracy by collaborating with cross-functional teams to align analytics with stakeholder goals, thus improving dashboard functionality and overall reporting efficiency

MECC Consulting Group

Sept. 2024 - Present

Technical Consultant

Ann Arbor, MI

- Delta Airlines: Developed machine learning model and full-stack web application using React and Python to predict optimal number of checked-in bags per flight that predicted decreasing departure delays for 70% of their flights
- Tempus AI: Cultivated 17-page strategic report for optimizing and scaling 3 predictive algorithms by aggregating digital pathology industry reports, 10+ pathologist interviews, and custom industry adoption curve in Python

Coachence

Jul. 2024 – Aug. 2024

Software Engineering Intern

Remote

- Prototyped internal portal to show Amazon driver rankings by harnessing driver data using Python, MySQL, and HTML/CSS, which was sent out to 100+ drivers to improve their performance and safety on the roads by 10%
- Analyzed driver safety data using Python visualizations and SQL queries to synthesize insights into executive-facing slides, securing buy-in from Coachence leaders to implement recommendations

Academic Advancements

Jan. 2021 – Aug. 2024

Co-founder, Math/CS Tutor

Hightstown, NJ

- Led go-to-market fundraising and marketing strategy for a 501(c)(3) nonprofit; built scalable operations, drove stakeholder alignment, mobilized 70+ volunteers, and established partnerships with 13 nonprofits by conducting needs assessment and stakeholder outreach, reaching 5,800 low-income students across 5 countries and \$22.5K raised
- Spearheaded the development and implementation of Python, computer literacy, and math curricular and tutored 20+ students in India and US, increasing average performance by 25%

Sung Robotics Lab, University of Pennsylvania

Jun. 2023 – Aug. 2023

Robotics Research Intern

Philadelphia, PA

- Engineered an affordable, novel 3D Light Detection and Ranging system (LIDAR) from a 2D LIDAR, using C++ and ROS, that enabled researchers to obtain a 3D visualization of 6 robots for analysis on contraction data
- Delivered 2D data to server via ROS communication protocol by coding 4 ROS nodes using C++ and Arduino; manipulated said data using matrix transformations, resulting in 3D point cloud containing 1000+ points

TECHNICAL SKILLS/ADDITIONAL

Languages: C++, Python (Pandas, Numpy, Matplotlib, Scikit-learn), Unix, HTML, CSS, JavaScript, Swift, SQL, Git

Skills: Microsoft Office, Tableau, Jira, Agile, Road-mapping, Stakeholder Engagement, Market/User Analysis

Hobbies/Interests: Violinist, NYT Mini Crossword connoisseur, Soccer and Pickleball enthusiast

Honors/Awards: PVSA Gold Medal, National Cyber Scholar, National Merit Scholar, Dean's List, University Honors
